

# ZONEPRO™ ADAS PLUS

**Fleetistics introduces ZonePro ADAS, a virtual coach tool that uses actionable voice prompts to alert drivers to dangerous behaviors**

- Improve driver behavior with live driver coaching
- Utilizes visual analytics and built-in G-sensor to detect events
- Provides driver scorecards at the end of each trip
- Allows managers to access and review event data from any connected device

**ZonePro ADAS consists of three easy-to-use components.**

**The ZonePro camera** is the eyes of system that watches what happens through the windshield.

**The ZD Drive Mobile app** is the brains of the system that translates what was seen.

The app determines when a coachable event occurred, notifies the driver, and captures the information that is important to you.

**The Coach's Portal** stores the information from the mobile app where it is easily displayed.

### What really happened?

View video and images of captured events and bookmarked items

### Proactive real-time training

Correct potentially dangerous driver behaviors as they occur

### Fully integrated with Geotab & other systems

Utilize the Geotab plan that you are already using to access your data

### Reduce fleet costs

Improving driver behavior can help you save money

- Reduced Accidents
- Reduced Insurance Premiums
- Improved CSA Scores

### Live voice coaching in real time including:

- Tailgating / Forward Collision
- Harsh / Aggressive Maneuvers
- Posted stop sign violations\*
- Lane drift
- Idle time
- Posted speed limit violation\*

Designed with fleet safety and budgets in mind, the ZonePro ADAS system installs in less than five minutes, uses cloud-based servers, and the driver application is easily installed on any connected device through the Google Play store. In addition, Fleetistics is offering you our patented-pending ZonePro camera at no charge with a service agreement. Contact your account manager or Fleetistics representative to learn more: email sales@fleetistics.com or call 877.467.0326.
